**Model** : ATZ U311-2  
**Description:** USB3.0 to HDMI with AUDIO

Operating Temperature Range.....(-15 to +55°C)  
Operating Humidity Range.....5 to 90% RH(No condensation)  
Weight.....35g

### Driver installation:

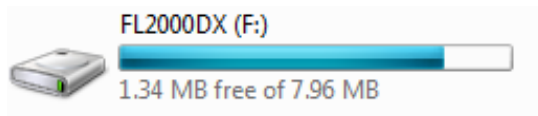

Connect the USB to HDMI adapter to the USB3.0 interface, at this time the computer system will automatically prompt and install the USB to HDMI adapter drive as follow:

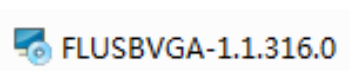

If automatic installation fail as follow:

Then in this case, manual installation is required. Please open your "computer" ICON, you will find a disk:

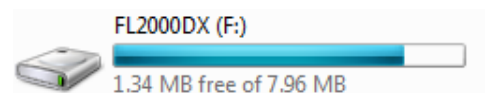

Open the disk and find the driver:

Double-click on it and complete the installation according to the prompt, after that restart your computer.

Note: After you install the driver, the disk as the picture will automatically disappear.

This disk will appear only when the computer is connected to the adapter for the first time. If it does not appear at the first connection, this indicate that your computer already has the disk or the similar disk installed previously. Please find and uninstall it, then restart the computer and install the driver according to the steps above.

Connect the USB to HDMI adapter to the USB 3.0 interface of the computer and connect the HDMI interface of the adapter to the HDTV, monitor, or projector via an HDMI cable.
