Model **:** ATZ US241
Description: USB 2.0, 4 PORT DATA SWITCH w/HOT KEY

Intelligent USB 2.0 data Switch allows four computers to share one USB 2.0 device .Only one computer can access the USB2.0 device each time. Normally, most of computers have been built-in 4 USB 2.0 down stream ports and each computer can easily has its own individual USB devices. But, it cost a lot of money on USB devices and the users might need to share each other personal USB devices without going through hot plug process.

Features:

● Four Computers share one USB 2.0 device
● Supports USB bus power mode
● USB 2.0 & 1.1 compliant
● Windows 98 SE / ME / 2000 / XP / Vista / 7 / 8 and Mac OS 8.6 and higher compatible.
● Using push button, hot Key to switch USB device port between IBM PCs and easy operation.
● Using push button to switch USB device port between Mac systems and easy operation.
● Easy extend USB down stream ports or add a 4 or 7 port USB hub to this USB device port for more USB devices connection to your computer.
