

Model : ATZ VC-VGA2RS

Description: PC to TV Converter-Composite & S-Video & VGA Loop-through (Scan converter)

Model : ATZ VC-VGA2RS
Description: PC to TV Converter-Composite & S-Video & VGA Loop-through (Scan converter)

With this converter, you can use TV as PC monitor to view presentations, games, pictures and movies or browse the Web. Want to hook up your computer to your TV but your TV doesn't have a VGA input? Then this is your solution. This converter box will convert a VGA computer display signal into a composite (Yellow RCA) or S-video TV display signal. It even has a VGA pass through so that you can keep your computer monitor connected while sending a signal to the TV. All outputs are driven simultaneously. Simple to use. It has fine tuning controls to adjust the picture to your preference. It draws power from an available USB port using a supplied USB power cable. Video cables are also included.
